About This Content

It has come to our attention that a disturbingly large number of unidentified psykers were found among the denizens of an Imperial world. The Ordo Hereticus has flagged this anomaly as a case of utmost priority.

This DLC contains a special Priority Assignment, which has its own plot and consists of a series of new missions. Upon completing the Assignment, you will be rewarded with a unique cosmetic item. (Please note that this assignment is only available after unlocking the Agartha Subsector.)

great open ended game that rewards skill i bought this last night and liked it alot but todays huge update turned this game on its head its incredible. Great little game that will give you a few minutes of fun. Has some funny moments that made me laugh. Game has achievements that are quite easy to obtain espesically if you follow one of the steam guides. I give the game a thumbs up and def recommend even though it is short and has no replay value but, hey its cheaper than a soda and will last you longer.. good gameplay but bad ending. One of the best soundtracks for a video game I've ever heard! keep up the good work Floex!. Nexon is upgrading more and more, with now alot of weapons, envent, maps, modes and alot of other tings. I see a great game in the future.. I bought the game earlier today and im hooked, I love the graphics and the gameplay so far and the gameplay is engaging, the learning curve is a little steep but with some practice it will be a game I cant get enough of, the only flaw I see is little to no detail on the programming unless i havent gotten to that part yet, solid game. Even if this were free, I would not recommend it.

The story is not clear at all and half of it is a camera just very, very slowly creeping down hallways with no action or narrative in sight. It has some interesting camera mechanics, but they bring nothing useful to the experience. The entire thing felt painfully empty.

The goal of a VR narrative expierence that this seemed to be trying to create was much better achieved by Quanero, which is a vastly more interestig and engaging experience.. This was one of the first games i ever got on steam, when i was 9 i would play this game with my bipolar\/ autistic brother. I would be the worm guy and he would always be the big magma dude. Back then he was happy, or at least happyer than he is rn. Jessus, the nostalga. This game gave me so many memories.. 10/10

Pros: Has Torgo

Cons: Perhaps could use more Torgo

At first I was disappointed because I thought the game only went up to 30FPS and it felt really weird to me, but then I realized you can switch between 15\/30\/60 FPS by pressing F4.

Anyway, this is a very good expansion for a very good game. It adds a lot of cool new items and graphics to the game that I would have never thought I needed. Scrolls that create a bridge through difficult terrain, many different potions and effects, improving the starting castle. This expansion is worth it.. very nice graphic design. good game.. A crappy knockoff of Uplink, a far superior, better engineered, and more compelling game. Don't waste your time even thinking about this game, just get Uplink.

If you must play through it, be prepared for unintuitive mechanics, a useless tutorial, and overly complicated visuals, which, while they make for great screenshots, only get in the way during gameplay.. Sisyphus Reborn is free to play for everyone, those who liked it can afterwards buy for not even a buck this mini-DLC to support the developer and also get some additional content.
In times where microtransactions are pretty much a necessity in full-price AAA games, this is just the most fair and honest way to finance a game i've seen by now.

A game? What am i talking? This migth be interactive media, but is far from being "played", it is experienced.. I want to like this game but right now its just too unpolished.
The good things: It's cute! Enemies arent that hard to kill. The puzzle parts arent hard to figure out. The general atmosphere in the game is fun.

The bad parts: Having to restart the level when you die. Losing your Spares when you die. Also when i have 90 Spares and i need 50 to fix something i expect it takes away 50 and letting me continue with my remaining 40, instead it takes all the scrap you have leaving you with 0 and that really confused me. Achievements dont make sense. Theres lag occuring when you break boxes. Later levels are very short.

Fixing these things would hugely improve this game but how it is right now i give it a 4/10. This game is like sitting on a tolet and not being able to♥♥♥♥♥♥ there should be something but as hard as you push nothing comes out.
. Fantastic concept and execution, the only minor criticism is it's a little light on the content, but it's not nearly as bad as some other VR games.. Funny game, easy achievements!

~ 7/10
